## **LANDSAIL TIRES: ENGINEERED FOR EXCELLENCE**

Sophisticated tread design. Advanced compounding. Steel-belted strength and endurance. They're all front and center in the Landsail line of passenger, light truck and SUV/CUV tires. Engineered and produced under the leadership of a European technology team, Landsail tires are setting new benchmarks for quality and value... and turning the heads of discriminating drivers all over the world.

## Performance Touring Tire

### EVERYTHING YOU WANT IN A TOURING TIRE, PLUS REDUCED FUEL CONSUMPTION.

The LS388's advanced compounding is formulated to help you save fuel with every mile you travel, while the tread design works to keep you stable and comfortable as the miles pile up.

**FUEL SAVING TREAD COMPOUND.** The LS388's advanced tread compound reduces rolling resistance, which helps boost your vehicle's fuel efficiency. And when doing this, you reduce exhaust emissions, too. Help save the environment while you save energy dollars.

**WET GRIP GROOVE DESIGN.** Four wide longitudinal grooves channel road water, while lateral grooves work to direct it out from under the tire.

**HIGH STABILITY CENTERING RIB.** The solid rib in the center of the tire ensures straight-line driving stability.

**LOW TREAD WEAR SHOULDER DESIGN.** The shoulder is integrated with heat-resisting bars to keep the tread blocks stable and protect them from irregular wear. For the same reason, the design also improves high-speed cornering stability.

**QUIET-RIDE PITCH ALIGNMENT.** Optimized tread pitch width and alignment quiet resonance and the road noise it creates.

All Season Ultra High Performance Tire

**A BLEND OF PERFORMANCE AND COMFORT IN AN ALL-SEASON ULTRA HIGH PERFORMANCE TIRE.**

You can have it all with this fuel-saving tire. Low road noise, smooth ride, wet road hydroplaning resistance and dry road handling.

**QUIETER RIDE.** Optimized tread pitch width and alignment reduces road noise levels at higher speeds.

**SMOOTH HANDLING.** Lateral and longitudinal grooves deliver more control.

**WET TRACTION.** Additional sipes and grooves improve hydroplaning resistance.

**DRY HANDLING.** A larger tire contact area allows grip, stability and control.

**SILICA COMPOUND.** Our advanced tread compound reduces rolling resistance, helping boost fuel efficiency.

**COMPUTER-AIDED-DESIGN (CAD).** The Future of Tire Technology is here with a tire designed to perform and look great!

# CLV2

## All Season Highway Crossover & Sport Utility Tire

### COMFORT, STABILITY AND PERFORMANCE AT HIGHWAY SPEEDS.

T, H, V, and W Speed rated so you'll feel confident at highway velocity, the CLV2 also features enhanced stability tread design and stylishly civilized good looks. You'll own the road.

WET TRACTION GROOVES. Four wide longitudinal grooves speed water evacuation for great handling and cornering on wet pavement.

SOLID STABILITY RIB. The continuous center rib ensures straight-line driving stability with just enough siping to further improve high-speed performance.

STABLE SHOULDER DESIGN. The large shoulders give you the contact patch you need for sure cornering and stability.

GRIP OPTIMIZED GROOVES. The design of the CLV2's lateral and longitudinal grooves delivers extra gripping ability, more control, and better braking performance.

# LS588 SUV/CUV

## All Season Performance Crossover & Sport Utility Tire

### COMFORT AND FUEL ECONOMY.

You CAN have a smoother, quieter ride now in a replacement SUV/CUV tire. This All Season Ultra High Performance tire provides redefined comfort with enhanced handling and stability. And you get better fuel economy with our advanced silica compound designed to reduce rolling resistance.

ADVANCED TREAD COMPOUND. Our advanced silica tread compound boosts rolling resistance and helps improve fuel efficiency.

OPTIMIZED TREAD DESIGN. Our computer-aided design has optimized the tread pitch and alignment, reducing road noise levels at higher speeds.

LATERAL AND LONGITUDINAL GROOVES. Deliver smooth handling and better control on dry and wet roads.

WET GRIP SIPES AND GROOVES. Added sipes and grooves improve hydroplaning resistance and handling on wet roads.

DRY GRIP. Tread design creates a much larger contact area allowing better stability, cornering and control.

# CLX9 MUDBLAZER M/T

## Mud Terrain Tire

### THE ULTIMATE TIRE FOR THE ULTIMATE OFF-ROAD CHALLENGE.

The best ratio of rubber and tread void effectively expels dirt from the tire under extreme road conditions.

**PUNCTURE GUARD TOUGHNESS.** Three tough layers of polyester cord fabric and high strength steel belts guard against rock and debris punctures.

**SUPER STABLE SHOULDER.** The varying shapes of the shoulder blocks are optimized for improved handling and control on unpaved roads.

**WETLAND OPTIMIZED GROOVES.** Angled lateral and longitudinal groove structure promotes better drainage for improved braking and handling on wet, soggy ground.

## All-Terrain Tire

**AN ALL-TERRAIN TIRE DESIGNED FOR OVERALL TRACTION AND HANDLING IN DIFFICULT OR RUGGED TERRAIN.**

Five-pattern block design is engineered to expel water and reduce noise under a variety of road and terrain conditions.

HIGH STABILITY TREAD CORNERS. The special cutting corner on all borders of the groove pattern makes it more dimensional while promoting driving stability and comfort.

ZIG-ZAG MIDDLE BLOCK. The zig-zag middle tread pattern reduces noise while the sloped corner repels rocks and improves earth-grasping performance.

SPECIAL SHOULDER SHAPE. The bench-shaped shoulder design provides excellent earth-grasping action for stable high-speed turns under dry and wet road conditions.

## Highway Terrain Tire

### THE PERFECT BALANCE OF TRACTION, QUIET AND COMFORT.

A continuous center rib maintains straight driving stability and improved braking performance.

NOISE-REDUCING SHOULDER. The closed shoulder design blocks noise from the middle of the tires for a quieter, more comfortable ride.

OPTIMAL MIDDLE PATTERN. The consistent middle pattern and uninterrupted closed shoulder design improves stability.

LONGITUDINAL TRACTION GROOVES. The longitudinal groove design is optimized for effective drainage, faster braking, improved acceleration and stable turning on wet terrain.

## Commercial Van Tire

### EURO-METRIC COMMERCIAL TIRES FOR EUROVANS.

These "C" designated tires are designed for higher load carrying capacities.

Fitments are available for a broad range of commercial vehicles.

THREE LONGITUDINAL GROOVES. Improved hydroplaning resistance while enhancing tire traction in wet weather.

STAGGERED SIPINGS. Improved braking ability when carrying heavier loads.

COMPACT SHOULDER. Enhanced shoulder stability optimizes high-speed cornering performance.

HEAT- RELEASING SHOULDER. Continuous "S" grooves improve heat-releasing ability to maximize tire mileage and improve fuel economy.

# WINTER LANDER

## Passenger Snow & Ice Tire

**AS SOON AS THE TEMPERATURE DIPS BELOW 40°, IT'S TIME TO PUT ON YOUR WINTER LANDERS.**

Winter Landers will get you through both snow and winter-wet conditions, even their tread compound was designed for the cold. They continue to provide stability and driving comfort when the weather clears.

**ADVANCED WINTER-GRIP COMPOUNDING.** The Winter Lander's tread compound is specially formulated for the cold—so it delivers enhanced traction and braking when warm-season tires can't.

**WET TRACTION TREAD DESIGN.** The V-shaped tread quickly evacuates water for outstanding wet handling, decreased hydroplaning and low noise.

**SNOW TRACTION GROOVE DESIGN.** The sipe pattern is organized in high-density waves so that each sipe can apply maximum force to the snowy road surface.

**3-D, STAY-OPEN SIPES.** They stay open when they make contact with the ground, to bite into snow more effectively.

**STIFF SHOULDER DESIGN.** The shoulder is specially designed with stiff blocks that deliver cornering stability and driving comfort.

# WINTER STAR

*Crossover and Sport Utility  
Snow & Ice Tire*

## WINTER STAR... BECAUSE BIGGER VEHICLES NEED BETTER SNOW TRACTION.

Don't miss out on winter sports or events this season. Put Winter Stars on when the temperature falls below 40°. Its zigzag sipes were specially designed for the snow, and its tread compound was designed for the extreme cold.

3-D, STAY-OPEN SIPES. They stay open when they make contact with the ground, to bite into snow more effectively.

COLD WEATHER TREAD COMPOUND. The Winter Star's high silica tread compound is formulated to improve grip, traction and braking in the extreme cold of northern winters.

ADVANCED SHOULDER DESIGN. The shoulder is specially designed to fight hydroplaning with small holes that efficiently absorb the thin layer of water that coats ice and snow.

WINTER-STABLE TREAD DESIGN. The extended center arrow block improves handling and braking stability while the large directional blocks on either side improve wet and dry grip.

# SNOW STAR

## Commercial Van Snow & Ice Tire

### EXCEPTIONAL COLD WEATHER TRACTION FOR VANS AND LARGE MINI-VANS.

Whether you are toting cargo or the kid's hockey team, you need the kind of winter traction and confidence that Landsail Snow Stars deliver. Put them on when the temperature falls below 40°.

3-D, STAY-OPEN SIPES. They stay open when they make contact with the ground, to bite into snow more effectively.

#### COLD WEATHER TREAD COMPOUND.

The Snow Star's high silica tread compound is formulated to improve grip, traction and braking in the extreme cold of northern winters.

WET GRIP GROOVE DESIGN. Three wide longitudinal grooves evacuate road water out from under the tire for improved steering, braking and hydroplaning resistance.

SAW TOOTH LATERAL GROOVES. They're designed to maximize grip force and maintain steering stability.

ADVANCED SHOULDER DESIGN. The shoulder is specially designed to reduce both wind resistance and heat build-up.

# 4 SEASONS

## All Weather Passenger Car Radial Tire

### DESIGNED FOR SPRING, SUMMER, FALL AND WINTER.

Both the tread compound and pattern are optimized for versatility in all seasons and weather conditions. Pattern blocks inside have high-density waves of stereoscopic sipes to maintain block rigidity and enhance both control and performance. You get lots of biting edges to increase traction on wet, snowy or icy roads.

QUIET RIDE PITCH ALIGNMENT. Computer optimized tread pattern pitches reduce the road noise caused by resonance.

BIG PATTERN OUTSIDE BLOCK DESIGN. It provides increased rigidity for enhanced control and performance.

WIDE LONGITUDINAL DRAINAGE GROOVES. Three wide longitudinal drainage grooves channel road water out from under the tire, improving control in the rain and snow.

INSIDE MULTIPLE CROSS PATTERN DESIGN. It helps the tire "swallow" more snow and makes the trapped snow stronger to enhance traction and grip on winter roads.

# 4 SEASONS VAN

## All Weather Commercial Van Tire

### EXCLUSIVE ALL-SEASON TREAD DESIGN.

Both the tread compound and pattern are optimized for versatility in all seasons, all weather conditions. Pattern blocks inside have high-density waves of stereoscopic sipes to maintain block rigidity and enhance both control and performance. You get lots of biting edges to increase traction on wet, snowy or icy roads.

### ANTI-SLIP MICROGROOVE DESIGN.

Microgrooves on the central apattern surface increases road holding force by increasing the contact between the tire and road surface.

DEEP-GROOVE DESIGN. Full depth grooves extend tire life mileage.

WIDE LONGITUDINAL DRAINAGE GROOVES. Three wide longitudinal drainage grooves channel road water out from under the tire, improving control in the rain and snow.

BIG PATTERN BLOCK DESIGN. Provides increased rigidity for excellent control stability and safety.

## **THE FUTURE OF TIRE TECHNOLOGY**

Led by a European technology team with over 80 years of experience in tire R&D and manufacturing, Sentury Tire has come roaring out of China to establish a presence in more than 150 countries and regions worldwide.

To accommodate growth, Sentury Tire has increased its manufacturing capacity with the opening of a new manufacturing facility near Bangkok, Thailand. This new state-of-the-art factory will utilize a comprehensive automated intelligence manufacturing process that improves product quality and minimizes production times.

In 2018, Sentury Tire will begin construction of a new car and light truck tire manufacturing operation in LaGrange, Georgia. This advanced tire manufacturing facility will utilize highly intelligent tire manufacturing processes that will increase efficiency and minimize production times to supply our customers throughout North American and the world.
